

TEAM ID :PNT2022TMID10671

PROJECT NAME : AI-powered Nutrition Analyzer for Fitness Enthusiasts

Build Python Code

Importing Libraries

The first step is usually importing the libraries that will be needed in the program.

Importing the flask module into the project is mandatory. An object of the Flask class is our WSGI application. Flask constructor takes the name of the current module (`__name__`) as an argument. The Pickle library is used to load the model file.
